Ann

I did get the attached two documents. However, I still haven't been able to get the secure site to load. I keep getting a script error. So I am not sure what is on that site.

Are you able to get the field data sheets and the scores for each variable from the consultant?

Andrea

Subject: Seven Hills Mine - Hydrogeomorphic Assessment Reports [WARNING: DKIM validation failed]

Please find attached the Hydrogeomorphic Assessment (HGM) for the wetlands found in the Seven Hills Mine permit area that was prepared by Eco-Tech Consultants, Inc. in December 2006. Also included is a HGM for the proposed on-site mitigation as well as several off-site mitigation areas that were available for use at that time. A few of these sites are no longer available. The field data sheets were not provided to the company with the finished report. There is only a summary table of the data provided.

If you have any questions, please let me know. Also, please send me a reply back if you received this.

Thanks,

Ann
